Youth-led climate strikes have been held every Friday 3-5 pm in front of London City Hall for the past year and will continue. For this week's events the student group has reached out to allies across the community for support.

"London's City Council voted in April 2019 to declare a climate emergency. Now it's up to us, the people who elected them, to show our councillors how important it is to us that the city takes real action to back up this declaration" says co-organizer Heenal Rajani.

"Fighting climate breakdown is about much more than emissions and scientific metrics – it's about fighting for a just and sustainable world that works for all of us. If we are going to fight for this and win, we need everyone!"
